

As a truck driver i need up to date wheather and traffic reports dailey. Satellite Radio is the only way of getting these when you need them. that is why I have XM Radio which pay for and don't think the National Association of Broadcasters have any right to dictate or complain about it. I respectfully urge the FCC to reject NAB'S petition 04-160 And support XM'S ability to provide the kind of programming that myself and many others demand and deserve.
